AMELIA TREVINO

(956)320-5000 | trevinoamelia25@gmail.com | linkedin.com/in/art13076| amelia-trevino.com | github.com/mela13076

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML5, CSS3
Frontend: React, Next.js, Tailwind CSS, Responsive Web Design
Backend & Databases: Node.js, Express, Django, REST APIs, Prisma, PostgreSQL, MySQL
AI, Cloud & Tools: Claude API, Gemini API, Google Apps Script, Azure, AWS, Vercel, Git, Github, CI/CD

PROFESSIONAL EXPERIENCE

Delivery Coordinator | CodePath **Jan 2026– Present**
Previously: Tech Fellow Manager, Tech Fellow June 2023 - Dec 2025

- Developed an AI-assisted review pipeline using JavaScript, Google Apps Script, and the Claude API to evaluate Tech Fellow video transcripts against rubrics, generating structured scores, feedback, and recommendations for human reviewers.
- Tested and improved the pipeline across 500+ Tech Fellow applications, adding transcript retrieval, structured JSON outputs, error handling, and resumable processing; reduced processing failures from 50% to 21% across separate pilot rounds.
- Coordinated technical testing and delivery of AI110 and AI201 courses, using AI to analyze student feedback, identify curriculum issues, and collaborate with engineering and operations teams on improvements.

Full-Stack Software Engineer Intern/ Backend Team Lead | GBCS Group **2024**

- Led a backend team modernizing 100+ REST APIs, contributing to the migration from Firebase to an Azure-based architecture using Node.js, Express, Prisma, and MySQL.
- Designed and implemented REST APIs supporting internal RFP workflows, document management, and cross-department collaboration within a custom business platform.
- Integrated Azure Blob Storage for file management and contributed to React frontend development, UI debugging, API integration testing, and application troubleshooting.
- Coordinated development priorities, reviewed pull requests, and managed Git branching and CI/CD workflows to support collaborative development and code quality.

PROJECTS

Learning Loop AI | AI-Powered Learning Platform
Next.js, React, TypeScript, Gemini API, Prisma, PostgreSQL, Clerk, Vercel

- Developed and deployed a full-stack AI-powered learning platform integrating Google's Gemini API to provide interactive tutoring, contextual explanations, guided hints, and dynamically generated quizzes for technical learning.
- Designed structured AI coaching workflows that guide learners through explanations, examples, and practice activities, integrating authentication and PostgreSQL-backed application data to support personalized learning experiences.

MDBlessings | Custom Small Business Website
Next.js 16, React 19, TypeScript, Tailwind CSS 4, Vercel

- Developed a mobile-friendly merchandise showcase for a small business, translating owner requirements into a branded website featuring product categories, filtering, photo galleries, pricing information, and individual product pages.
- Designed a custom-order inquiry experience to connect customers with the business owner, using typed TypeScript product data and reusable React components while keeping the architecture extensible for future content management features.

DevFolio | Configurable Developer Portfolio Platform
Next.js 16, TypeScript, Tailwind CSS 4, MDX, Vercel

- Designed and developed an open-source portfolio platform using Next.js App Router, React Server Components, and MDX, separating content, configuration, and presentation to support maintainable, content-driven websites.
- Implemented a reusable theming and configuration system that enables developers to customize site content, appearance, and layout without modifying core application components, and published the platform as a documented GitHub template.

EDUCATION

M.S in Computer Science | Texas A&M University-Kingsville | GPA: 4.0 **2025**
B.S in Electrical Engineering | Texas A&M University-Kingsville | GPA: 3.7 | Math & CS Minors **2023**
